

FRISELVA is part of a family group in the pork agri-food sector with more than 70 years of tradition. FRISELVA's values: Integrity, Humility, Excellence and Sustainability, together with our commitments to our different stakeholders, are the pillars that define our corporate culture.

FRISELVA is committed to the ENVIRONMENT and develops its activity with SUSTAINABILITY as a value, promoting the circular economy, preventing pollution derived from the environmental aspects of the activity and the life cycle of its products, complying at all times with the requirements of the laws and regulations applicable to environmental protection and encouraging innovation and development of new products to adapt to the environment and achieve the sustainable development of the company.

FRISELVA identifies the issues of the organisation and its context, which affect its ability to achieve the expected environmental results, and determines the needs and expectations of the parties interested in the environmental management of the organisation.

At FRISELVA we have implemented an Environmental Management System based on the ISO 14001:2015 standard, to drive environmental improvement and periodic audits are carried out to ensure that the established points are met.

Friselva is involved in preventing pollution, using resources sustainably, reducing waste generation, mitigating climate change and protecting ecosystems as well as biodiversity. This is why the company has a 5R philosophy: reduce, repair, reuse, recycle and constantly rethink how to optimise resources.

FRISELVA's General Management assumes the aforementioned commitments and annually reviews the objectives, allocating the necessary resources to achieve them.

MIQUEL RAMIÓ COSTA

Chief Executive Officer
